<expand-bar> and <expand-item>

Creates ExpandBar and ExpandItem widget.
Example :

```
<expand-bar style="SWT.V_SCROLL">
        <composite id="item1" style="SWT.BORDER">
            <row-layout type="SWT.VERTICAL" />
            <label text="comp1"></label>
            <label text="comp2"></label>
            <text style="SWT.BORDER | SWT.MULTI"/>
        </composite>
        <expand-item _control="item1" text="Expand Item1" expanded="true" >
        </expand-item>
        <composite id="item2" >
            <row-layout/>
            <label text="comp434"></label>
            <text style="SWT.BORDER"/>
            <button style="SWT.RADIO" text="Click me"/>
        </composite>
        <expand-item _control="item2" text="Expand Item2" >
        </expand-item>
</expand-bar>
```
